Welcome to Games Workshop's 2009 Citadel Miniatures Collector's Catalogue

Welcome to the 2009 Collectors Catalogue. The Collectors range is intended to both complement and supplement our main ranges which aim to provide all the essential troops types, characters and machinery required to assemble an army for Warhammer or Warhammer 40,000 or build forces to play our The Lord of The Rings game. In selecting models for the 'Collectors' range we have used three main criteria as explained below.

Showpiece models are display pieces, often dioramas or set-pieces, primarily intended for painting and display rather than gaming. Although this is a small part of the Collectors range at the moment we hope to add more showpiece models over time.

Alternative models are metal alternatives to plastic models in the main range, or alternative character variants too numerous and varied to include in the main Catalogue. Some of these models have been drawn from previously discontinued ranges but compare well in quality to modern designs – others are brand new additions to the Collectors range.

Historic models are slices of Citadel's history – they are models that remain popular amongst collectors either because they have special significance as design landmarks (such as the Armour Through The Ages) or because they are charming, characterful or just plain quirky. Generally speaking, these models do not match the quality of modern designs and they are often significantly smaller.

Citadel has been manufacturing cast metal miniatures for almost 30 years – and during that time we have produced many thousands of different designs. Although the original

rubber moulds used to make the miniatures wear out and perish over time, a carefully assembled archive of metal 'master' models is maintained enabling us to recreate many old 'classics'. Sadly, the archives are not 100% complete by any means. Some of the production methods used in the early days utilised conversions of the masters which were then destroyed during the moulding process. Other masters have been lost or damaged over time. Models designed to be cast in old-fashioned lead alloys may be impractical to cast using modern lead-free alloys and equipment. A proportion of our older models were produced under licenses that are no longer valid. Even so, we have an accessible archive of something like 16,000 different individual cast pieces.

Our policy is to maintain a catalogue of Collectors models of a size that we can reliably manufacture and supply. We can't hope to make all of our entire archives available at once, so instead we will cycle through our back-catalogues, dropping pieces where demand is low and adding pieces that are commonly asked for or which we think will be popular. Although models will always be retained in the range if there is genuine demand – we cannot guarantee that any models will be available year after year – and would suggest that serious collectors make purchases whilst models are available rather than taking a chance.

Our Collectors range is growing all the time as we add new models or recommission moulds from our archives. The complete and up-to-date catalogue will therefore be found on our web-site at www.games-workshop.com.

USING THIS CATALOGUE

About the Models

Most of the models in this catalogue are shown painted. All models are supplied unpainted. All miniatures are shown at ACTUAL SIZE, unless otherwise noted. All models that require a base are supplied with the correct plastic Citadel miniature slottabase.

The models shown in this catalogue are shown assembled. This is not how they are supplied. All models will require some assembly. Most models require nothing more complicated than affixing the miniature to its plastic base.

Showpiece

The strange and dangerous worlds of Warhammer and Warhammer 40,000 come to life under the sculptor's touch! We let our expert designers loose to explore the Warhammer and Warhammer 40,000 background universes however they liked – free from the constraint of making miniatures strictly for the gaming table. It has proven an interesting challenge – and here we see only the very first of what we hope will become a popular series with top painters and serious collectors.

WARHAMMER®

WARHAMMER™ 40,000

Animosity Orcs

99060209201

Greenskins live for violence, and in the absence of any enemies they will cheerfully fight amongst themselves. This model, sculpted by Alex Hedström, portrays two Orc Boyz settling their differences with their fists and an unfortunate Night Goblin. This model would make a great marker to represent an Orc unit stalled by Animosity, or a characterful way of filling out the ranks of an Orc Boyz mob.

WARHAMMER®

Sculpted by Juan Diaz in 2004, the model depicts Tehenhauin as the living vengeance of his kind against those that desecrate the lands of the Lizardmen. He carries the 'Blade of the Serpent's Tongue', and is surrounded by a swarm of serpents, beasts of the jungle that are drawn to him and follow him everywhere. The still-beating heart of a Skaven is held aloft, a sacrifice to Sotek.

Old One Eye was a Tyranid creature of the Carnifex genus recovered from the ice-packs of Calth in the empire of Ultramar. Its release from the ice heralded a series of Tyranid raids on that world. The eventual fate of Old One Eye is unknown, but there have been several other reports of lone, injured Carnifexes on other worlds which proved to be just as deadly. Old One Eye would make a great alternative Carnifex model in a Tyranid army.

THOUSANDS OF PRODUCTS

THREE WAYS TO BUY THEM ALL

The full Games Workshop hobby range now contains literally thousands of products with more added every month. There are three ways in which you can buy anything from our complete range.

1

AT GAMES WORKSHOP HOBBY CENTRES

- **Range of products**

All our centres stock a large range of Warhammer 40,000, Warhammer and The Lord of The Rings games and models as well as all the hobby materials you need to collect, build and paint your armies.

- **In-store order point**

Many of our stores have a Direct in-store order point which you can use to access our entire range, including Specialist Games, Collectors and Bitz Packs allowing you to individualise your Warhammer, Warhammer 40,000 and The Lord of The Rings forces.

- **Free painting & modelling advice**

No matter what your level of painting or modelling skill, if you spend 30 minutes with one of our members of staff you will see those skills improved and might find out something you never knew!

- **Free gaming & tactics advice**

All our staff are experienced gamers (after all it's what they do for a living!). They can give you sound tactical advice, help you build battle-winning armies and clear up most of your rules queries.

- **Free beginners programme**

Our special Beginners' programme teaches you how to play and helps you take your first steps into the Games Workshop hobby. The programme runs regularly and there are also points in the week when you can indulge in more gaming too. All you need to do is come along!

- **Gaming Rooms and Battle Bunkers**

Like regular Hobby Centres, all Gaming Rooms and Battle Bunkers provide the full range of Games Workshop services. However they are larger than a normal Hobby Centre and have many tables, which makes them perfect for meeting fellow hobbyists.

Call your local customer service team or go to our website at www.games-workshop.com to find your nearest Games Workshop Hobby Centre, Gaming Club or local toy & hobby store.
